Education at Iowa - Over 125 Years of Excellence in Education

Introduction to Universal Design and Universal Design for Learning

John Achrazoglou

ICATER - Iowa Center for Assistive Technology Education and Research

Objectives

- History of Universal Design
- Principles and examples
- Universal Design for Learning (UDL)
- Demonstration
 - *Kurzweil 3000*
 - *Dragon Naturally Speaking 8*
- Questions – Answers - Discussion

History of Universal Design

United State Life Expectancy

History of Universal Design

- 1950's barrier free movement
- 1961 the American Standards Association (The American National Standards Institute, ANSI)

History of Universal Design

- “Disability Rights” Movement of the 1960’s
- Architectural Barriers Act of 1968.

History of Universal Design

- The Rehabilitation Act of 1973 Section 504 - reauthorization Section 508
- Technology Related Assistance for Individuals with Disabilities Act of 1988, Amended 1998 (Tech Act)
- Individuals with Disabilities Education Act, or IDEA 1997
- Americans with Disabilities Act, 1990

Definition

Universal design - The design of products and environments to be usable by all people, to the greatest extent possible, without adaptation or specialized design.

PRINCIPLE ONE

Equitable Use

The design is useful and marketable to people with diverse abilities.

PRINCIPLE TWO

Flexibility in Use

The design accommodates a wide range of individual preferences and abilities.

PRINCIPLE THREE

Simple and Intuitive Use

Use of the design is easy to understand, regardless of the user's experience, knowledge, language skills, or current concentration level.

PRINCIPLE FOUR

Perceptible Information

The design communicates necessary information effectively to the user, regardless of ambient conditions or the user's sensory abilities.

Closed captioning of text as it is spoken.

PRINCIPLE FIVE

Tolerance for Error

The design minimizes hazards and the adverse consequences of accidental or unintended actions.

PRINCIPLE SIX

Low Physical Effort

The design can be used efficiently and comfortably and with a minimum of fatigue.

PRINCIPLE SEVEN

Size and Space for Approach and Use

Appropriate size and space is provided for approach, reach, manipulation, and use regardless of user's body size, posture, or mobility.

Universal Design for Learning

Design of *flexible* instructional *materials* and *activities* that allow the learning goals to be achievable by those with differences in their abilities and learning styles.

Universal Design for Learning

Universal Design for Learning

Flexibility built into the design of the curriculum and materials not added afterwards.

Universal Design for Learning

Rethinking and guiding

- Goals
- Methods
- Materials
- Assessments

Universal Design for Learning

Multiple means of:

- Representation
- Expression
- Engagement

Universal Design for Learning

Multiple methods and assessments

Digital Text

- Can be
 - Enlarged
 - Spoken
 - Colored
 - Highlighted
 - Embossed to Braille
 - Supplemented with supports

Digital Books

Libraries, Magazines, Newspapers

Universal design vs. Assistive technology

Universal design

The design of products and *environments* to be usable by all people, to the greatest extent possible, without adaptation or specialized design.

Assistive technology

Any item, piece of equipment, that is used to maintain or improve functional capabilities of *individuals* with disabilities.

Universal design vs. Assistive technology

Assistive technology

Universal design
technologies

Research

Component Display Theory, (Merrill, 1983)

Multiple Learning Styles and Technology (Rockman *et al*, 1996)

Using Technology to Individualize Reading Instruction (Rose & Dalton, 2002)

Los Angeles Scientific Evaluation 2004 (Boster, 2004)

Research

Neuroscience – Brain Research **Three brain networks**

1. *Recognition*
Identifying and categorizing
2. *Strategic*
Planning and performing
3. *Affective*
Engagement and motivation

(Vygotsky, 1962) (Rose, 2000) Center for Applied Special Technology (CAST)

Research

Iowa Text Reader Project 2004-2005

Iowa Assistive Technology Liaison, 2005

Using a text reader with “embedded study skills” brought:

- Better than expected improvement in reading rates.
- Positive correlations between the level of implementation and reading fluency and comprehension.
- Strong positive feelings by students and teachers.

Issues and Barriers

- Awareness and training
- Costs
- Effort and time
- The future?
